## PROFILE

Experienced **Ruby on Rails Engineer** with 5 years of impactful contributions. Developed integrations with 3rd-party systems, implemented type checking with **Sorbet**, and optimized processes. Successfully rebuilt and migrated a product to a **Ruby on Rails engine**, while integrating **GCP** functions with **Rails** and **React Native App**. From Mendoza, Argentina but currently based in Mexico City.

## EMPLOYMENT HISTORY

### L2 Ruby on Rails Engineer at Buk, Mexico

June 2023 — Present

Created and implemented an integration with a 3rd-party being one of the first on the team that used **Sorbet** to type our files, using cache to avoid multiple requests and using **DelayedJob + Redis**.

Working in **SLOs** on core processes that were giving time-outs on our biggest tenants (we use Apartment)

### Ruby on Rails Engineer at Beetrack / DispatchTrack, Chile

August 2021 — May 2023

Rebuilt a whole existing product to a **ruby on rails engine** to be mounted on top of our main product as an add-on.

Migration of **SQS** to **RabbitMQ**

Implemented and developed **GCP** functions that had impact on both **Rails** and **React Native App** with **Firebase**.

### Upwork Freelance - Ruby on Rails, Argentina

March 2020 — August 2020

+1000 hours on ruby on rails projects on Upwork being the most remarkable KeyClouding (that was acquired by Talana) where I started as a software developer and ended my contract with a higher role having a cell of 5 people under my charge.

### Jr Software Engineer at Aldibs, Argentina

May 2017 — October 2019

My first professional experience that started with the engineers that gave a Rails course, owners of the company, liking the way I got involved on the course.

Got basic **docker** experience and **TDD**

**Multi-tenant** architecture using Apartment.

Studied **Spree/Solidus** core for a custom implementation with **MercadoLibre / MercadoPago** for a marketplace project.

Last project, and the one they gave me more freedom with, was migrating a **PHP** to **RoR**.
